However, income limits apply. Russ Thornton, a paid financial advisor, who focuses on women's retirement planning, says investing in yourself can also pay off to a large extent. Fortunately, you can get that return by paying high interest debts and saving the money you would normally pay for interest each month. Suppose you have a credit card balance of \$10,000 to 18% APR and have made minimum payments to this card for years. You probably want to keep your emergency fund in an account that you can access, such as a high-yield savings account. In addition, consider saving for emergencies if you have not already done so. "Although it may not look like a ton of money, an extra \$100 per month will pay the balance 47 months earlier and save nearly \$4,000 in interest," says Peach. Taylor Schulte, a financial planner at HSA, who is also a guest of the Podcast Stay Wealthy Pensionement, says that assuming an emergency savings fund is in place and that the high-interest debt is paid, the best place to put extra money is in a Health Savings Account (HSA). "HSA is the magical unicorn of tax-facilitated investment accounts," he says. (See also: 7 Easy Ways to Build a \$0 Emergency Fund) 4 . 4.
